

Product Description

1-Component modified polymer sealant, that combines the best from silicone- and polyurethan sealant. MS sealant is highly elastic with a flexibility at app. 20%, and can be used in most joints in the building industry. MS sealants has an excellent adhesion to most substrates at interior buildings, and can be painted with most water-based paints.

Directions for use

The surfaces must be dry and clean and free of dust and loose particles. Apply the sealant with a hand gun, and level the joint with a wet sponge or jointing stick. MS Sealant can be painted with most common water-based paints, but a test is recommended

Safety & environment

Personal protection equipment must be used. For information regarding safety, health and environment see Material Safety Data Sheet (MSDS) at www.bj.dk.

Technical data

Binder:	1-Component polymer
Type:	
Gloss:	App. 5, matt
Vol. dry:	
Colours:	White
Drying:	1-2 mm per day at 20° C. RH.: 65%.
Application:	
Thinning:	Not to be thinned
Coverage:	Aproxx 1 ltr./m ² /mm
Tools:	Hand gun
Mal-Code:	00-1 (1993)
